

A vertical collage of various picture frames. The frames are of different shapes (square, oval) and materials (gold, silver, wood). They are arranged in a vertical strip, overlapping each other. The frames are shown in various orientations, some upright and some tilted. The background is white.

Flagship Expo

The picture frame & allied products manufacturing sector in India is experiencing remarkable growth, especially in the post-pandemic era. This period has witnessed substantial expansion, attributed to factors such as the proliferation of framing shops in rural areas and increasing awareness of interior decor and art appreciation. In a remarkably short timeframe, over 150 manufacturing plants for the framing industry have been established across India. Moreover, India's framing exports have surged to unprecedented levels, with recent export data positioning India as the third-largest global exporter in framing. Given this momentum, it is anticipated that India will soon ascend to the second position in the global framing market.

Immerse yourself in a world of innovation, creativity, and craftsmanship. Whether you're a seasoned professional or just starting out, India Frame Expo is your gateway to the latest trends, technologies, and techniques in framing.
